Volume 19 (1993–4)

Altinkemer, K., A.R. Chaturvedi and S. Kondareddy, Evolution of America's infostructure, (6) 483
Anandalingam, G., *see* Vernekar, A., (6) 595
Antunes, C.H. and J. Clímaco, Decision aid for discrete alternative multiple criteria problems: A visual interactive approach, (3) 185
Archer, N.P., R. Ma and S. Chen, A basis for an object-oriented discrete simulation library, (5) 455
Assimakopoulos, N.A., Systemic project management process for information systems, (5) 349
Bennavail, J.-C., *see* Singh, M.G., (4) 277
Blodget, H., *see* Maurer, H.E., (2) 77
Blum, B.I., Characterizing the software process, (4) 215
Burattini, E. and M. De Gregorio, Qualitative abduction and prediction. Regularities over various expert domains, (5) 471
Buttò, M., C. Moiso and M. Porta, Use of an AIP tool to select NTM expansive controls, (5) 365
Cao, D., M. Installé, A. Nino de Zepeda and M. Maino, A global optimization approach to resource allocation problems with consideration of economies of scale, (4) 257
Chaturvedi, A.R., *see* Altinkemer, K., (6) 483
Chau, P.Y.K., Decision support using traditional simulation and visual interactive simulation, (1) 63
Chemouil, P., *see* Khalfet, J., (4) 339
Chen, S., *see* Archer, N.P., (5) 455
Chen, Z., *see* Lockwood, S., (4) 311
Choudhury, A.M., *see* Maurer, H.E., (2) 77
Christodoulou, N., M. Wallace and V. Kuchenhoff, Constraint logic programming and its application to fleet scheduling, (3) 135
Clímaco, J., *see* Antunes, C.H., (3) 185
Davison, R., P. O'Brien and D. O'Sullivan, Decision support for configuring telecommunication services, (4) 297
De Gregorio, M., *see* Burattini, E., (5) 471
Demaël, J.J. and A.H. Levis, On generating variable structure architectures for decision-making systems, (4) 233
Dorny, C.N., *see* Vernekar, A., (6) 595
Economides, A.A., Hierarchical resource sharing. NCP and VIP formulation, (5) 379
Fetterolf, P.C., *see* Zell, B., (6) 507
French, J.C., DIRE: An approach to improving informal scientific communication, (6) 527
Gong, X.K., *see* Liao, T.W., (5) 445
Han, B.T., Optimal file management for a storage system using magnetic and optical disks, (5) 393
Hipel, K.W. and D.B. Meister, Conflict analysis methodology for modelling coalitions in multilateral negotiations, (2) 85
Hutchinson, J., Has artificial intelligence delivered on Wall Street?, (2) 105
Installé, M., *see* Cao, D., (4) 257
Jo, K.Y., M.P. Scher and J.R. Mitchell, Modeling and analysis of the defense information infrastructure, (6) 577
Khalfet, J. and P. Chemouil, Application of fuzzy control to adaptive traffic routing in telephone networks, (4) 339
Kondareddy, S., *see* Altinkemer, K., (6) 483
Kuchenhoff, V., *see* Christodoulou, N., (3) 135
Lee, S.C., *see* Ramchandani, N.L., (2) 121
Levis, A.H., *see* Demaël, J.J., (4) 233
Liao, T.W. and X.K. Gong, Laser threat recognition based on fuzzy set theory, (5) 445
Liebowitz, J., Expert systems and interactive multimedia technologies in telecommunications, (6) 499
Lin, C.-L., W.-R. Wu and C.-M. Liu, A practical process to integrate time and logic dimensions for system performance evaluation, (5) 423
Liu, C.-M., *see* Lin, C.-L., (5) 423
Lockwood, S. and Z. Chen, Modeling experts' decision-making using knowledge charts, (4) 311
Ma, R., *see* Archer, N.P., (5) 455
Maino, M., *see* Cao, D., (4) 257
Maurer, H.E., H. Blodget, C. Vermillion, A.M. Choudhury and M.O. Quader, Remote sensing technology for Bangladesh, (2) 77
Mehta, M.S., *see* Rawani, A.M., (1) 55
Meister, D.B., *see* Hipel, K.W., (2) 85
Mentzas, G., Object-based intelligence in office and production processes. A view on integration, (4) 195
Mitchell, J.R., *see* Jo, K.Y., (6) 577
Mohapatra, D.K., *see* Rawani, A.M., (1) 55
Mohapatra, P.K.J., *see* Rawani, A.M., (1) 55
Moiso, C., *see* Buttò, M., (5) 365
Mwasele, S.L., Effects of the use of a computer-based decision model on elements related to the outcome of a group decision process, (4) 211
Nino de Zepeda, A., *see* Cao, D., (4) 257
O'Brien, P., *see* Davison, R., (4) 297
O'Sullivan, D., *see* Davison, R., (4) 297
Parisini, T. and R. Zoppoli, Team theory and neural networks for dynamic routing in traffic and communication networks, (1) 1

* The issue number is given in parentheses before page numbers.
